Contratiempo, puntillo y ligadura

A continuación, veremos elementos de la partitura, estos alteran y varían el ritmo y la duración de las notas, estos elementos son: el Contratiempo, el puntillo y la ligadura.

El contratiempo – Ya sabemos que cada tiempo se puede dividir en 2 con las corcheas, la primera corchea se llama “Tiempo Fuerte” y la segunda “Tiempo débil”, el contratiempo ocurre cuando tocas en el tiempo débil, mientras que el tiempo fuerte queda en silencio.

El puntillo – El puntillo es un punto negro que se escribe al lado de una figura rítmica, lo que hace es sumar la mitad del valor. Por ejemplo, una negra vale un tiempo, si le pones un puntillo, sería 1.5 tiempos o una negra + una corchea.

Es así con cualquier figura, añades su mitad a su duración

La Ligadura – La ligadura es una línea curva que une 2 notas sumando su duración, es especialmente usada con 2 propósitos. Uno es conseguir duraciones que no existen y no se pueden crear con el puntillo y el segundo es unir 2 notas a través de 2 compases

Esta ligadura es la ligadura de prolongación, existe otra ligadura llamada ligadura de expresión, esta se usa para tocar legato, y en lugar de unir 2 notas, se coloca encima (o debajo) de una frase.
